

Investigation 1: Email Analysis

Tools Which I Used:

BehindTheEmail, Hunter.io, MXToolbox, DNS Checker

My Findings:

- Checked email validity and format.
- Analyzed email-related records.
- Examined mail server information.
- Learned how email security systems work.

My Learning:

This activity helped me understand how email services operate and how email information can be analyzed during cybersecurity investigations.

Investigation 2: Image Metadata analysis

Tools: ExifInfo, FotoForensics

- Examined image metadata.
- Checked image details and properties.
- Learned basic image forensic analysis.

Learning:

Learned how hidden information in images can be useful during digital investigations.

Approximate GPS Location

This information is interpreted from the GPS metadata. **Locations are approximate.** Although the co devices typically have low accuracy.

Approximate Coordinates	28.772264,77.737406
Approximate Location	3.94 miles (6.33 km) NW of Hāpur, IN
Approximate Range	Unspecified; assume +/- 3218 meters (2 miles)
Approximate Address	QPCQ+P3W, Jogipura, Uttar Pradesh 245206, India

Investigation 3: Domain Intelligence Analysis

1. Objective : To conduct a domain intelligence assessment using OSINT tools.

2. Tools used : WHOIS, DNS checker , IPinfo

3. Methodology:

Selected a publicly accessible domain. < Performed WHOIS lookup .< Examined DNS records < Analyzed MX records and mail infrastructure. < Investigated hosting IP information. < observations.

WHOIS Domain Lookup

Look up registration details, contacts, and nameservers for any domain name

Enter a domain name...

fifa.com

WHOIS Information

Investigation 4: Threat Intelligence Analysis

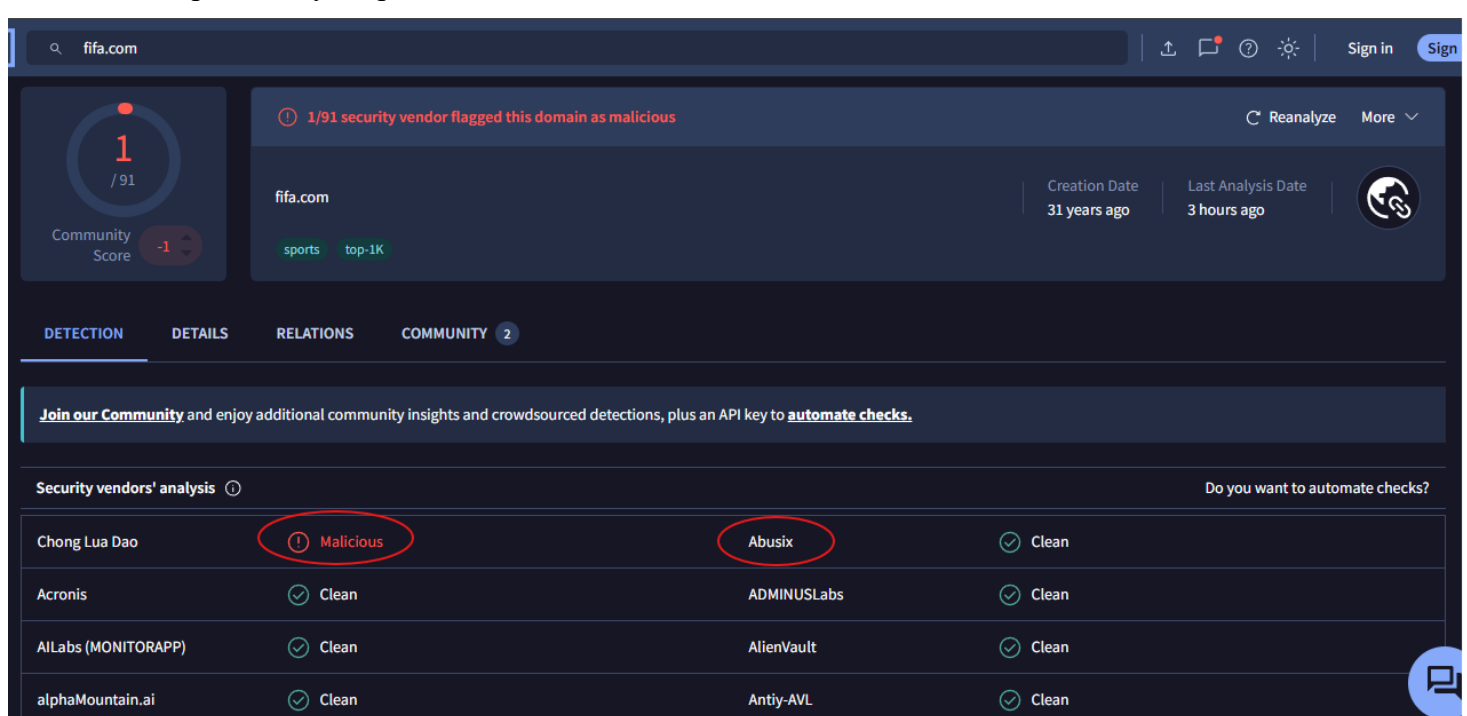

Tools: VirusTotal

Findings:

- Analyzed a URL, IP address, or file.
- Checked security reputation information.
- Observed threat intelligence results.

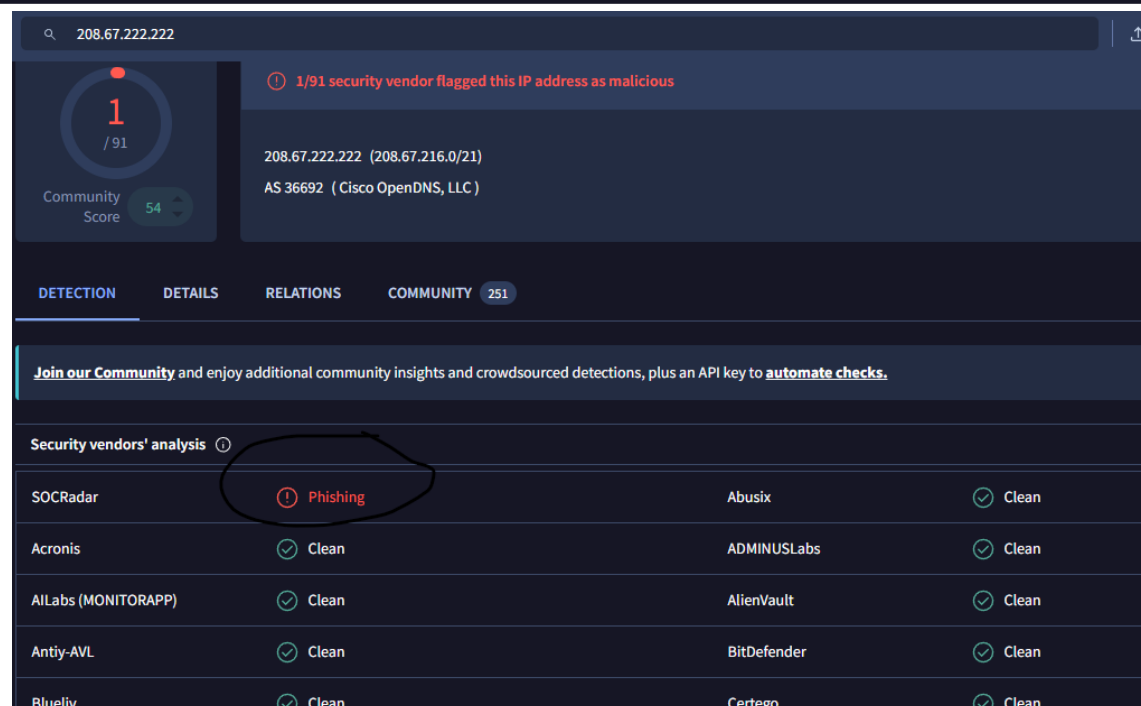

Learning:

This activity helped me understand how threat intelligence platforms can be used to identify potentially suspicious online resources.

The screenshot shows the VirusTotal interface for the domain **fifa.com**. The top section displays a community score of 1/91 and a warning: "1/91 security vendor flagged this domain as malicious". Below this, the domain is categorized as "sports" and "top-1K". The "DETECTION" tab is active, showing a table of security vendors' analysis. The table has two columns for vendor names and their results. The first row shows "Chong Lua Dao" with a "Malicious" result (circled in red) and "Abusix" with a "Clean" result (circled in red). The other vendors listed are Acronis, AllLabs (MONITORAPP), alphaMountain.ai, ADMINUSLabs, AlienVault, and Antiy-AVL, all with "Clean" results.

Security vendors' analysis	Do you want to automate checks?
Chong Lua Dao	Malicious
Abusix	Clean
Acronis	Clean
ADMINUSLabs	Clean
AllLabs (MONITORAPP)	Clean
AlienVault	Clean
alphaMountain.ai	Clean
Antiy-AVL	Clean

The screenshot shows the VirusTotal interface for the IP address **208.67.222.222**. The top section displays a community score of 54/91 and a warning: "1/91 security vendor flagged this IP address as malicious". Below this, the IP address is categorized as "AS 36692 (Cisco OpenDNS, LLC)". The "DETECTION" tab is active, showing a table of security vendors' analysis. The table has two columns for vendor names and their results. The first row shows "SOCradar" with a "Phishing" result (circled in red) and "Abusix" with a "Clean" result. The other vendors listed are Acronis, AllLabs (MONITORAPP), Antiy-AVL, BitDefender, Blueliv, ADMINUSLabs, AlienVault, and Certego, all with "Clean" results.

Security vendors' analysis	Do you want to automate checks?
SOCradar	Phishing
Abusix	Clean
Acronis	Clean
ADMINUSLabs	Clean
AllLabs (MONITORAPP)	Clean
AlienVault	Clean
Antiy-AVL	Clean
BitDefender	Clean
Blueliv	Clean
Certego	Clean

Investigation 5: Google Dorking Basics

Tool: Google Search

Findings:

- Explored advanced search operators.
- Learned how publicly available information can be discovered.
- Improved understanding of information gathering techniques.

Learning:

This activity helped me understand how search engines can be used to find publicly available information for research and cybersecurity investigations.
